## *Experimental Type Design*

This experimental type design was created for a Typography 1 class at NVCC. I chose to explore opposites in the form of silence and noise. As a teacher, there are times when I experience noise as a loud overwhelming sound, and sometimes the noise creates a soothing hum that's almost silence. Silence on the other hand can be the perfect absence of noise or so deafeningly still that it's loud.

### *Uwh ACCs T-shirt Detail*

Front design consists of an underwater hockey player and the outline of the states that are on the Atlantic coast.

Back design is a stylized underwater goal, with the O in score acting as the puck going into the goal. Underwater hockey requires that you hold your breath while playing underwater, so the text implies that you should score first before going up for air.
